President's Message

Ray Stubblefield

Apologizing again for last year's TOWA Insider issues. We are trying to get out an early issue for our advertisers and to let members know that TOWA has been busy working with TECQ on the new mandated maintenance provider school. Also we are working with KEENA and TOWTRC to get the March conference on schedule. If you have not received information on the TOWTRC spring conference, normally in Waco, you can go to TOWA's internet site and get conference registration and motel information.

But as Tim will update you in another article in this issue. The classes will not be until later in the year.

As for the TOWTRC show in Mesquite, it looks like it will be the best show in years, if pre-registration is any kind of indicator. So! Book your motel reservations and I'll see you at the luncheon. Until March, be careful, be quality, be professional.

God Bless All,

Tim Taylor, Dixon Dryden and staff have been working hand in hand with TCEQ to get the maintenance provider classes up and going as quick as possible.

TOWA Membership Renewal

By Tim Snyder

Dear TOWA Member,

Happy New Year! As with many things it is time to renew your TOWA Membership for 2010.

This is the point where I am always questioned about why should we rejoin TOWA, what has TOWA done for me? My standard answer is that TOWA is the Only Professional Organization that represents the interests of Texas Onsite Professionals.

A good example of this is TOWA's success in helping to defeat HB 229 during the latest legislation session. If this Bill had passed each individual who holds a TCEQ issued OSSF license would have been required to purchase a 2 million dollar liability insurance policy or lose your licence. TOWA has already received word that this bill or one like it will be introduced during next year's legislative session.

TOWA also keeps our members informed of TCEQ rule changes and provides CEU's for our members. We provide these services and more for \$95.00 (\$0.26 per day) per year for individual memberships and \$160.00 (\$0.44 per day) for Corporate memberships. That is less than you you would spend on a Coke each day.

Please fill out the membership form on Page 9 and mail or fax it in today.

Thank you for your past and future support,

We are looking forward to a great conference that we co-sponsor with the Research Council in Mesquite. Please come by the TOWA booth to get your member's free ticket.

Best wishes for good health and prosperity in the new decade.

Tim Taylor
Managing Consultant

Many of you may have already renewed, thank you. For those who have not please reconsider and join us as TOWA continues to fight for our industry. Those of you who are coming to the March Show please email me at tntaylor1@msn.com. We are trying to get an estimate for the luncheon.

Thanks,
Tim

Advanced Onsite Solutions

Standard 40

Onsite
Monitoring
Ready

Hoot Systems product certifications surpass 3 on CBOD, 2 on TSS and 6 on TN.

Above are four specially configured Hoot Systems at the Baylor University Wastewater Treatment Research Program site in Waco, TX. Hoot is researching the next generation of wastewater treatment devices for Nitrogen Reduction and other emerging contaminant issues in Texas.

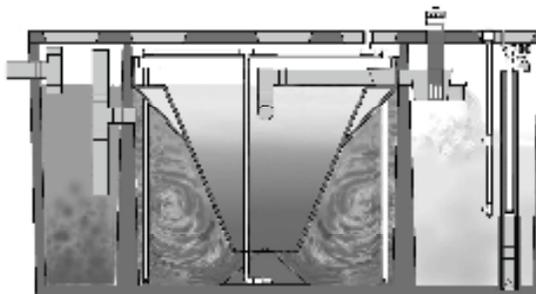

NSF's new Standard 245 was just adopted by the Joint Committee and Harris County is requiring it in areas surrounding Lake Houston. Hoot has ALREADY tested to the new standard.

Rather than playing catch up like our competition, we set new standards by proving what onsite can do. Additionally, no other brand gives you more treatment, control and disposal options.

Hoot Systems are designed and installed in the most difficult sites, in environmentally sensitive areas, where sewers are not available and septic just isn't good enough, think...

TCEQ Update

From www.tceq.state.tx.us

FOR IMMEDIATE RELEASE

Rockwall County Business Owner Sentenced in Falsification of Documents Investigation

Friday, December 18, 2009 - Philip Ching Robins sentenced to two years probation

The Texas Commission on Environmental Quality today announced the sentencing of a Rockwall County man, as a result of a falsification of documents investigation conducted by the TCEQ Environmental Crimes Unit.

On Dec. 17, 2009, Philip Ching Robins, owner of Robins Engineering, was sentenced to two years probation for his role in making and presenting falsified on-site sewage facilities (OSSF) maintenance inspection reports to both Rockwall County and the TCEQ. Robins pleaded guilty to one count of false statements in violation of Texas Water Code 7.149, was ordered to surrender his TCEQ-issued maintenance provider license, and ordered to pay a \$10,000 fine. The investigation found that Robins not only falsified maintenance inspection reports, but also had his employees falsify inspection reports

that were subsequently submitted to the county.

The TCEQ is responsible for implementing and maintaining a regulatory program over the location, design and reporting requirements related to OSSFs. The program also includes requirements for the licensing of individuals who engage in maintenance provider service. The TCEQ has delegated the OSSF program to the county and designated the Rockwall County Environmental Health Department as the authorized agent of the agency.

The investigation was conducted by the TCEQ Environmental Crimes Unit with assistance from the Rockwall County Fire Marshal's Office. The case was prosecuted by the Rockwall County District Attorney's office.

McLennan County (Waco) Changes Their Orders

By Jerry Snyder

McLennan County is the latest county to change their orders regarding homeowner maintenance (See text of change at right).

There are now in excess of 50 counties that require homeowners to either have maintenance contracts or be trained to perform their own maintenance. This is a very encouraging trend. It shows these county officials are concerned about the health and well being of their citizens not to mention the environment.

I am not sure what the State Legislature was thinking when they passed a law allowing homeowners to maintain their own aerobic systems with NO training. Maintenance providers are required to attend a 16 hour course, pass a test and have continuing education every year. This subject should be revisited in the next Legislature. During my inspections each month, I routinely find air compressors not working, spray pumps not working, broken spray heads and alarms silenced or disconnected. Some of these homeowners are repeat offenders who never call with a problem. These are the backyards that the neighborhood children and pets may play in. After all, children and pets love to play in mud.

As you can see the McLennan County maintenance requirements allow the homeowners four options.

Number 2 is the one that concerns me the most. By allowing an Installer II to provide the training, I fear it will be "whoever is the cheapest" will do the training, whether they are familiar with the brand of system or

not. Please be aware of the liability you are incurring by training homeowners. Whether you are found liable or not the cost of a lawsuit will be very high.

Please call TOWA if you have any questions or would like assistance in getting your county's orders changed.

McLennan County commissioners had already voted to allow homeowners to do maintenance without any training or schooling. After this vote Jerry Snyder wrote and sent by certified mail a letter which went to each commissioner and the County Judge. Armed with facts and figures that TOWA furnished him with his letter was taken seriously by one commissioner who called Jerry and requested a meeting with him.

As a result of Jerry Snyder talking to this one commissioner the homeowner maintenance issue was put back on the courts agenda. The full result is published on the next page. Jerry did not get everything he wanted but at least the owners who want to do their own maintenance must report and pay for some type of training.

TOWA can help you change your Counties Septic Orders. Give us a call if you are interested.

Annual March TOWTRC Conference

The Waco convention center is going to be remodeled and will not be available for the 2010 Annual TOWTRC conference.

The conference committee looked and visited several sites in 5 different cities and decided that the Mesquite Convention Center offered the best combination of facilities and location for the March 2010 show. The exhibit area is about twice the size of Waco's and the hotel/motel locations are actually more convenient than those in Waco.

In addition there are numerous restaurants close to the convention center and parking at the center is abundant. The classrooms are very nice and are adjacent to exhibit hall. The facility is just off the 635 Loop on Rodeo Drive so it is easy to get to.

The speaker line up for the conference is excellent. TOWA will hold a Basic Maintenance Provider Course on March 7th and 8th at the convention center. Exhibitor set up will be on March 8th and the conference will be all day March 9th and half a day on the 10th. Expectations are to fill 95 booths and the exhibit hall will be open until 6:00 p.m. on the 9th to allow attendees extra time to spend with the exhibitors.

TOWA will have a link for online registration and info on local hotels/motels as soon as it available.

Mark the dates and be sure to attend what should be our best conference to date.

"oh, it's that smell again"

FUME GUARD

Local Enforcement Problems?

Attend a TOWA Chapter Meeting and Report Local Enforcement Problems

10 TOWA Chapters throughout the State hold periodic meetings that give 2 hours of continuing education credits as well as offer a forum to discuss local enforcement issues.

If an issue cannot be handled locally, your Chapter contact will refer the problem to the TOWA Enforcement Chairmen and legal counsel.

If you do not tell us what problems you experience that impact the industry, we cannot help to solve them!

RED JACKET Water Products

Red Jacket Utility/Filtered Effluent Pumps are designed for tough Filtered Effluent Systems. Models E518 and E610 are both equipped with 1/2 hp, 115V, NEMA motors. The built-in strainer protects against blockage and passes up to 1/16" solids through the pump. The Models E518 18 GPM and E610 10 GPM pumps have a maximum capacity of 25 GPM and a maximum head of 195'.

The New Model FE Bottom-Inlet, High Head Submersible Pump from Red Jacket is ideal for use in Filtered Effluent Systems. This New FE pump is available in a 16 GPM and 26 GPM 115V or 230V model pump with capacities to 37 GPM and heads to 145'. Features include stainless steel construction, a 1 1/4" NPT discharge, a built-in automatic reset overloads, a built-in removable bottom suction strainer, solid handling to 1/8", a silicon carbide seal, and a continuous duty PSC motor make it a long lasting, reliable pump.
